Alexandria, Egypt
- Excellent in honors  
Higher Institute of Advanced Management Science and Computing Kilo 47 Abu Matamir
- Front end developer track 3 months  
ITI

## PROJECTS

### Scubers Website

- Is a scubers co official website , scubers clients can book diving activities, add to card & view dive centers, dive clubs, livaboards, dive experts
- App built using : react.js, react-router-dom, material-ui, mui-icons, firebase authentication, react-i18next, formik, axios, dayjs, react-google-maps/api, react-oauth/google and more

### Scubers Dashboard

- Is a dashboard platform to manage and access for each following as a separate accounts dive center or freelancer
- App built using : react.js, react-router-dom, material-ui, material-ui-icons, firebase authentication, react-i18next, formik, axios, dayjs, yup, moment, google-map-react, js-cookie, react-slick, slick-carousel, dotenv and more

### Scubers Admin Dashboard

- Is a scubers co owner dashboard platform to manage and access all dive centers , dive clubs , freelancers and customers
- App built using : react.js, react-router-dom, react-table, material-ui, mui-icons, firebase authentication, formik, axios, dayjs, yup, moment, google-map-react, js-cookie, dotenv and more

### Intrack Dashboard

- Is a better version from time doctor, now app in staging phase
- dashboard has authentication, individual & company integrations, manage users, timesheets, projects report and Screenshots flows with crud operations and filters
- App built using : react.js, react-router-dom, react-redux, redux-thunk, react-table, material-ui, mui-icons, formik, axios, dayjs, yup, moment, js-cookie and more

### InClass Dashboard

- Is a e-learning dashboard site to manage and control educational process between instructors and students and courses
- dashboard has until now authentication, instructors, students, courses and system configuration flows with crud operations and filters, and assistant, quiz, assignment, school, faculty, wallet flows will implement next
- I only implemented following in this project not working in all project like previous above projects :
  - discussion form in session flow contains post listing page and post details page
  - listing page to listing posts with comments(replays) for each post and can accept , reject , delete each post
  - details page to show post with eaditable inputs using single update api
  - update UI and functionality for students flow contains : listing students page , student details page , student details course details page (form paid courses , pending courses lists)
- App built using : react.js, react-router-dom, react-redux, redux-thunk, react-table, material-ui, mui-icons, formik, axios, dayjs, yup and more
